SUMMARY

Product-minded technologist with a Computer Science background and experience spanning enterprise data engineering at a Fortune 100 bank, co-founding a consumer mobile startup as CEO, and growing an independent media brand to 7,000+ organic subscribers. Combine hands-on technical execution with product strategy,

EXPERIENCE

Co-Founder & CEO | Whimbitz — Mobile gaming startup (iOS & Android) Nov 2024 – Present

- Lead product strategy, roadmap, and prioritization for a two-person founding team; translate user research and growth data into technical requirements and direct backend execution by technical co-founder.
- Own the end-to-end product lifecycle from concept through launch, including App Store and Play Store submission, privacy disclosures, TestFlight beta cycles, and post-release stabilization.
- Architected and built the entire mobile frontend — iOS in SwiftUI and native Android in Kotlin — owning UX, UI, and feature delivery from wireframe to ship.
- Established analytics tracking downloads, retention, and engagement; use insights to prioritize features, refine onboarding, and shape content strategy.
- Run all paid and organic growth across Meta, TikTok, and Reddit ads and brand-owned channels; source and manage freelance vendors (illustrators, sprite artists, composers) on Fiverr and Reddit across parallel commissions.

Data Engineer | Capital One Aug 2023 – Nov 2024

- Served as primary engineer on receipt verification for Capital One's acquisition of the Kohl's card portfolio, validating successful migration of 10 million customer accounts; built reconciliation and verification logic in Python and SQL across Databricks and Snowflake.
- Designed handoff and triage protocols for failed migrations, partnering with operations, engineering, and compliance teams to escalate and resolve account-level exceptions during a high-visibility, time-sensitive migration.
- Owned autopay configurations and recurring-payment business rules for the Bass Pro Shops co-branded portfolio, maintaining the underlying SQL/Databricks data flows powering uninterrupted billing for active customer accounts.

Software Engineering Intern | Capital One — Data Governance Team Summer 2022

- Built an internal chatbot for the Data Governance dashboard, gathering requirements from stakeholders, translating them into technical specs, and shipping a working prototype that improved discoverability of governance metadata for engineers across the enterprise.

Founder & Writer | Offline Crush (Substack) Nov 2024 – Present

- Grew an independent newsletter on internet culture and the indie web to 7,000+ subscribers organically, with zero paid acquisition, by publishing essays, original graphics, and zines on a consistent editorial cadence.
- Use platform analytics to identify high-performing themes, refine voice and format, and inform content roadmap; manage brand identity, audience engagement, and editorial calendar.

EDUCATION

Bachelor of Science, Computer Science | Indiana University 2023

SKILLS

Product & Strategy: Roadmapping, requirements definition, prioritization, agile/scrum, stakeholder management, lifecycle ownership, A/B testing, KPI definition.

Languages & Tools: Python, SQL, Swift/SwiftUI, Kotlin, Java, Databricks, Snowflake, Git; native iOS and Android development; API integration; chatbot/LLM integration, Claude Code, Cursor, Codex, Canva, Affinity, Adobe Creative Cloud, Capcut, Firebase, AWS, Google Analytics.

Growth & Analytics: Meta, TikTok, and Reddit paid ads; SproutSocial; ad creative production; organic social and community building; product analytics, retention and engagement reporting, growth attribution.

Communication: Translating technical concepts for non-technical audiences, written long-form content, brand voice, cross-functional collaboration, vendor sourcing and negotiation.
